FedEx Web Services Label Evaluation Cover Sheet

INSTRUCTIONS

This label evaluation cover sheet must be used when submitting FedEx Web Services labels for review by the Bar Code Analysis Group. Upon receipt of labels, the submitter will receive the evaluation results within three business days. Once labels are approved, the submitter will receive an email advising how to point the application to the FedEx production environment.

NOTE: In order to avoid processing delays in the evaluation, it is important that this cover sheet accompany each packet of labels submitted for review.

Make sure the labels have been printed and scanned if sending via email. Ensure they are not blurred images and that barcodes are crisp with no lines through them.
